Apple 3GL is one of the best performing perennial ryegrass varieties in the recent NTEP trial. Apple 3GL has extreme salt and cold tolerance, making it a great choice in northern climates where salt and snowmelt are used. Apple 3GL also has excellent drought tolerance, ranking in the top statistical category in the recent NTEP trial. In addition, Apple 3GL is gray leaf spot resistant allowing it to excel in any situation. Choose Apple 3GL and get a first-class ryegrass.
SEEDING AND OVERSEEDING  Apple 3GL readily establishes on loosened bare soil or after verticutting existing turf for renovation and overseeding. For typical new seeding applications, apply at a rate of 5-7 lbs. per 1000 sq. ft. Periodic reseeding at 3-5 lbs. per 1000 sq. ft. maintains density for visual appearance and durability. For overseeding dormant warm season grasses, a rate of 30-40 lbs. per 1000 sq. ft. is suggested for golf course greens. And 7-10 lbs. per 1000 sq. ft. (300-450 lbs. per acre) for tees, fairways and roughs.

MAINTENANCE  Apple 3GL will form a tight knit turf under a broad range of soil types and environmental conditions, from full sun to medium shade. It will mow cleanly at heights of 1/2” and above.

AREAS OF USE
- HIGH TRAFFIC AND HEAVY WEAR AREAS
- PROFESSIONAL SPORTS TURF
- TEES AND FAIRWAYS
- SOD PRODUCTION
- LAWN AND LANDSCAPE
- HOME LAWNS
- TOP-QUALITY OVERSEEDING FOR WARM-SEASON TURF
