CHOOSE A WINNER

GrandSlam GLD (Gray Leaf and Drought tolerant) is a high-quality perennial ryegrass bred with resistance to gray leaf spot and improved drought tolerance. If you struggle in an area affected by Gray Leaf Spot or just want to have the security against it choose GrandSlam GLD. Its dark green color makes it an ideal choice for use on golf courses, sports fields, home lawns and for professional landscapers. Its drought tolerance and fast establishment also make it a great choice if you require a high-quality overseeding variety. Choose the winning variety - choose GrandSlam GLD.
**SEEDING AND OVERSEEDING**

GrandSlam GLD readily establishes on loosened bare soil or after verticutting existing turf for renovation and overseeding. For typical new seeding applications, apply at a rate of 5-7 lbs. per 1000 sq. ft. Periodic reseeding at 3-5 lbs. per 1000 sq. ft. maintains density for visual appearance and durability. For overseeding dormant warm season grasses, a rate of 30-40 lbs. per 1000 sq. ft. is suggested for gold course greens. And 7-10 lbs. per 1000 sq. ft. (300-450 lbs. per acre) for tees, fairways and roughs.

**MAINTENANCE**

GrandSlam GLD will form a tight knit turf under a broad range of soil types and environmental conditions, from full sun to medium shade. It will mow cleanly at heights of 1/2” and above. Due to its tillering ability and compact profile GrandSlam GLD can be maintained at fairway cutting heights when appropriate management practices are observed.
