

Stellar 4GL continues the outstanding line of Stellar ryegrass cultivars with this 4th generation Gray Leaf Spot (GL) resistant entry! It excels in NTEP traffic stress trials at multiple locations. It also beats Crown Rust and Pink Snow Mold handily. Combining elite turf quality, and some of the fastest Divot Recovery around, make Stellar 4GL the stellar choice in perennial ryegrass!

#1 UNDER TRAFFIC STRESS

GREAT TRANSITION ZONE QUALITY

IN SEEDLING VIGOR

NTEP DISEASE TRIAL LEADER

AREAS OF USE

- High-Traffic & Heavy Wear Areas
- Professional Sports Turf
- Tees & Fairways
- Sod Production
- Residential Lawns
- Warm-Season Overseeding

SEEDING

Stellar 4GL readily establishes on loosened bare soil or after verticutting existing turf for renovation and overseeding. For typical new seeding applications, apply at a rate of 5-7 lbs/1,000 sq ft. Periodic reseeding at 3-5 lbs/1,000 sq ft maintains density for visual appearance and durability. For overseeding dormant warm season grasses, a rate of 30-40 lbs/1,000 sq ft is suggested for golf course greens. And 7-10 lbs/1,000 sq ft (300-450 lbs/acre) for tees, fairways and roughs.

MAINTENANCE

Stellar 4GL will form a tight knit turf under a broad range of soil types and environmental conditions, from full sun to medium shade. It will mow cleanly at heights of ½" and above. Stellar 4GL can be maintained at fairway cutting heights when appropriate management practices are observed.
