

# Dynamite G-LS

## DYNAMITE G-LS

TALL FESCUE

- GREAT DROUGHT TOLERANCE
- QUICKEST TILLERING
- NTEP SHADE WINNER
- HIGHEST FALL TURF QUALITY

### LIGHT THE FUSE ON THIS LATERAL SPREAD™ CULTIVAR!

**Dynamite G-LS** (PPG-TF 254) is a fall standout for turfgrass quality. Enhanced with *Lateral Spread™* (LS) technology, **Dynamite G-LS** produces rapidly establishing, quick tillering plants that are perfect for shade and sod production. It stands up to tough diseases like Pythium blight, *Grey Leaf Spot* (G), and makes fewer clippings, resulting in less mowing over time. Outstanding fall color and density. For all seasons and uses, choose **Dynamite G-LS!**

### AREAS OF USE

- PROFESSIONAL LAWN AND LANDSCAPE
- HOME LAWNS
- MUNICIPAL USE
- SPORTS FIELDS

### TURF QUALITY - TRANSITION

Dynamite G-LS scored very high in turf quality for the Transition region.

2020 NTEP Mean Turfgrass Quality Rating - Transition Region

### TURF QUALITY - LOW-MOW

Dynamite G-LS scored high in overall turf quality under low-mow conditions (1.5").

2020 NTEP Mean Turfgrass Quality Rating, 1.5" Mow - Blacksburg, VA.

**SEEDING AND OVERSEEDING** Tall fescue prefers warmer soil for germination, typically 55°F to 58°F. In the Transition zone this means early spring and early fall. Further north, late spring and late summer is preferred. Dynamite G-LS should be sown at a rate of 6 to 9 lbs per 1000 sq ft (275 to 400 lbs per acre), lightly covered with soil, and kept moist until after the first cutting. Maximum density is achieved by planting with a slicer/seeder or following aeration, and with the application of a starter fertilizer. First mowing's are generally within three weeks, or when plants first reach 3 inches in height. Overseed existing tall fescue at a rate of 225 to 300 lbs per acre.

**MAINTENANCE** Dynamite G-LS natural dark color, density, and pest resistance minimize the need for extensive maintenance. Generally 2 to 3 pounds of nitrogen as part of a balanced fertilizer applied annually is all that's required. Cutting heights should range between 2 to 3 inches. Under controlled conditions heights down to 1 inch can be satisfactorily maintained.
