

HOME RUN LS
PERENNIAL RYEGRASS

FITS ANY SITUATION...WITH BETTER RECOVERY

- TOP NTEP (A, B AND C)
- TOP RATED DIVOT RECOVERY
- TOP RATED SEEDLING VIGOR
- TOP RATED TRANSITION ZONE DISEASE RESISTANCE
- TOP RATED FOR ALL AROUND DISEASE RESISTANCE

Home Run LS is a proven performer, ranking very high in the recent NTEP trials. **Home Run LS** has excellent overall turf quality, ranking in the top statistical category under A, B and C maintenance schedules. So whether you manage intensively or maintain your turfgrass with minimal inputs, **Home Run LS** can meet your needs. **Home Run LS** also has great divot recovery and wear tolerance thanks to its LS characteristics. **Home Run LS** also has excellent overall disease resistance, ranking at the top of the NTEP. When you need to score big, choose **Home Run LS**.

LATERAL SPREAD TECHNOLOGY LS™

Mountain View Seeds Lateral Spread Technology is the term MVS applies to the process of seeking turfgrass with greater potential for increased stand density, particularly under stress, and self-recuperation from traffic, thinning or injury.

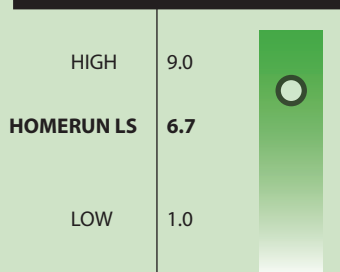

NTEP DATA

VARIETY	% DIVOT RECOVERY	TURF QUALITY SCHED. A	CROWN RUST RESISTANCE	TURF QUALITY SCHED. B	TURF QUALITY SCHED. C
HOMERUN LS	92.6	6.3	7.7	6.7	6.0

AREAS OF USE

- HIGH-TRAFFIC AND HEAVY WEAR AREAS
- PROFESSIONAL SPORTS TURF
- TEES AND FAIRWAYS
- SOD PRODUCTION
- LAWN AND LANDSCAPE
- HOME LAWNS
- TOP-QUALITY OVERSEEDING FOR WARM-SEASON TURF

GRAY LEAF SPOT RESISTANCE

Homerun LS has excellent GLS and other transition zone disease resistance.

2017 NTEP Trial Gray Leaf Spot Rating

SEEDLING VIGOR

Homerun LS has excellent seedling vigor, jumping out of the ground and providing fast cover.

2017 NTEP Trial Mean Seedling Vigor

SEEDING AND OVERSEEDING Homerun LS readily establishes on loosened bare soil or after verticutting existing turf for renovation and overseeding. For typical new seeding applications, apply at a rate of 5-7 lbs. per 1000 sq. ft. Periodic reseeding at 3-5 lbs. per 1000 sq. ft. maintains density for visual appearance and durability. For overseeding dormant warm season grasses, a rate of 30-40 lbs. per 1000 sq. ft. is suggested for golf course greens. And 7-10 lbs. per 1000 sq. ft. (300-450 lbs. per acre) for tees, fairways and roughs.

MAINTENANCE Homerun LS will form a tight-knit turf under a broad range of soil types and environmental conditions, from full sun to medium shade. It will mow cleanly at heights of 1/2" and above. Due to its tillering ability and compact profile Homerun LS can be maintained at fairway cutting heights when appropriate management practices are observed.
