

Confetti III

PERENNIAL RYEGRASS

CONFETTI

PERENNIAL RYEGRASS

VIGOROUS AND DURABLE

- **LOWER INPUT REQUIREMENTS**
- **DENSE-LEAFIER TEXTURE**
- **RESISTS SCUFFING/WEAR**
- **MEDIUM DARK COLOR**
- **SUN AND SHADE**

Confetti III perennial ryegrass is a next generation Mountain View Seed release that is broadly adapted to most cool season environments with disease and heat tolerance that extends its usage successfully into the Transition zone.

Confetti III is also a popular component of blends intended for winter overseeding of dormant bermudagrass from the Southeast across to the Southwest United States.

Confetti III features a leafier texture, medium dark green color, quick germination, and rapid fill-in. Confetti III forms a more durable turf that withstands traffic patterns and active use. It has a broad disease and insect tolerance profile, including patch and snow mold. Confetti III survives moderate combinations of heat and drought stresses with less loss of stand density.

Confetti III is suggested for both sunny as well as shaded areas under little to normal fertility and varying Ph soils.

VISUAL TURF QUALITY - HIGH MAINTENANCE FAIRWAY

	Quality	Color	Density	Uniformity	Plot Coverage
Confetti III	8.0	6.8	7.0	7.5	89%
Trial mean	6.6	6.0	6.2	7.0	83%
LSD	1.5	0.7	1.2	0.9	18%

Confetti III was 1 of 24 varieties tested for fairway overseeding quality including the newest perennial, hybrid, and turf annual ryegrasses, poa trivialis, and blends. In all categories **Confetti III** delivered strong based performance.

Fairway overseeding trial, University of Arizona, 2010 data.

AREAS OF USE

- LANDSCAPED AREAS
- SPORTS TURF
- GOLF COURSE TEES/ FAIRWAYS
- DORMANT OVERSEEDING
- RESIDENTIAL LAWNS

COOL SEASON TURF QUALITY

PPG PR 123	6.6
Confetti III	4.6
Phenom	4.6
Citation Fore	4.6
Shining Star	3.7
LaQuinta	3.3

Confetti III's broad genetic background helps it to endure the environmental as well as traffic and management stresses at the Adelphia, NJ location.

Rutgers University Turf Trial A09-2010 data Lsd = 0.8. Selected varieties including highest and lowest.

TRANSITION

Confetti	56%
Trial mean	51%
Lsd	16%

Confetti III is less competitive during the bermudagrass grow-back season, allowing for a more uniform playing surface.

Fairway Overseeding Trial, University of Arizona, 2010 data.

SEEDING AND OVERSEEDING **Confetti III** readily establishes on loosened bare soil or after verticutting existing turf for renovation and overseeding. For typical new seeding applications, apply at a rate of 5-7 lbs per 1000 sq ft. Periodic reseeding at 3-5 lbs per 1000 sq ft maintains density for visual appearance and durability. For overseeding dormant warm season grasses, a rate of 30-40 lbs per sq ft is suggested for golf course greens. And 7-10 lbs per sq ft (300-450 lbs per acre) for tees, fairways, and roughs.

MAINTENANCE **Confetti III** will form a tight knit turf under a broad range of soil types and environmental conditions, from full sun to medium shade. It will mow cleanly at heights of 1/2" and above. Due to its tillering ability and compact profile, **Confetti III** can be maintained at fairway cutting heights when appropriate management practices are observed.
