

VANGUARD™

PLATINUM BLEND OF FINE FESCUE

Introducing the latest member of the MVS Platinum Blends: Vanguard Fine Fescue! Vanguard is formulated with only top-performing NTEP cultivars from four different species: **Navigator III** Creeping Red Fescue, **Radar II** Chewings Fescue, **Beacon II** Hard Fescue, and **Seamist** Slender Creeping Red Fescue. We've curated the optimal fine fescue blend with four pillars in mind; diverse disease resistance, shade tolerance, turf quality and performance in both low and high maintenance regimes. An added bonus is the built-in salt tolerance exhibited by Seamist Slender Creeping Red Fescue! The diversity of the four fine fescue species bring strength and balance suitable for multiple applications.

UNPARALLELED SHADE TOLERANCE

DIVERSE DISEASE RESISTANCE

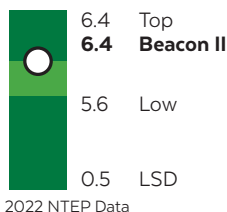

DENSE SWARD

BROAD APPLICATION USE

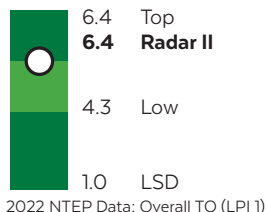

AREAS OF USE

- Golf Course Fairways & Roughs
- Hillside & Natural Settings
- Heavily Shaded Areas
- Low Maintenance & Unmowable Areas

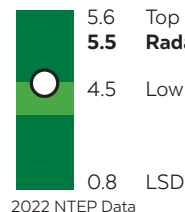

FALL DENSITY

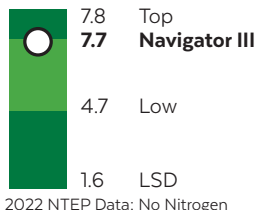

TURF QUALITY

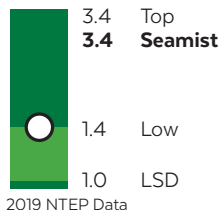

FAIRWAY MOWING

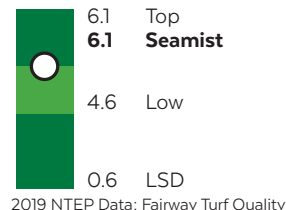

LOW MAINTENANCE

TRAFFIC STRESS

FAIRWAY TQ

MAINTENANCE

Vanguard will thrive under higher maintenance schedules for Golf course fairways and roughs. A low input regime should be used for natural areas, hillsides and hard to reach environments to achieve desired purpose and aesthetic.
