

BOLT
KENTUCKY BLUEGRASS

- RAPID GERMINATING VARIETY
- VERY FAST ESTABLISHMENT
- HIGH TURF QUALITY
- OUTCOMPETES WEEDS AND SUPPRESSES POA
- DISEASE RESISTANCE
- FINE BLADED

JUMPS OUT TO A QUICK START

Bolt jumps out of the ground faster than any other Kentucky bluegrass in the recent NTEP trials. **Bolt** ranked first in seedling vigor and % establishment. It's a rapid germination and fast establishment allow it to crowd out weeds, suppress poa and form a dense sward. **Bolt** exhibits top NTEP turf quality and fine bladed texture make it an ideal choice for all applications. **Bolt** has excellent disease resistance and is well adapted to both high and low maintenance uses. **Bolt's** quick establishing ability makes it a great choice for sod farms, sports fields and home lawns.

Bolt has excellent color, maintaining it's dark green color throughout the year.

2012 NTEP Winter Color Rating (NC)

SEEDING For most applications, Bolt should be sown at 2-4 lbs per 1000 sq. ft. or 100-175 lbs per acre. Consistent watering is very important until after the first cutting. Legend is ideal for renovating existing turf that has been damaged or thinned by disease or wear. Overseed at 1 1/2 to 2 1/2 lbs per 1000 sq. ft.

MAINTENANCE Bolt is versatile, growing well in both full and partial shade, and under both high and low maintenance programs. Mow as necessary, removing no more than 1/3 of the leaf. Bolt can be maintained at 1/2" height when adequate moisture and nutrients are available. At a minimum, fertilize annually with 2 to 3 lbs of nitrogen per 1000 sq. ft. in a balanced formulation. More intensive programs produce a denser, more attractive turf.
