

Heritage is an improved common bermudagrass that exhibits excellent density. It has superior color compared to other improved common bermudagrasses and rated in the top group for turf quality in the NC State trial. Heritage has survived cold Northwestern US winters attesting to its improved winter hardiness. This variety offers great quality and performance at an economical price. An excellent choice for your landscaping needs!

Arizona Common	6.0	4.4	5.3	7.0	3.1
LSD	0.8	0.5	0.8	0.5	1.0

ESTABLISHMENT

Heritage should be planted in areas of full sunlight when soil temperatures reach a consistent 65°F (18°C) and are on the rise. Plant 2-3 lbs of seed per 1,000 sq ft. in a well prepared firm seedbed. Cover seed with no more than 1/4 inch (6 mm) of soil. Maintain adequate soil moisture around seed using frequent but light irrigation for optimum germination. Seedlings should emerge in 12 to 21 days. As seedlings develop, decrease frequency of irrigation but increase the amount of water applied. As turf matures, follow recommended turf watering guidelines for your growing region.
