

Slugger 3GL is another top-rated NTEP performer from Mountain View Seeds. Slugger 3GL combines all the traits you expect in a great variety, along with excellent gray leaf spot resistance. Slugger 3GL ranked at the top in turf quality under management schedules A and B. Slugger 3GL has excellent color and leaf texture, producing a dense attractive turf. Slugger 3GL also ranked at the top of the spring greenup NTEP trial, showing excellent winter-hardiness and the ability to grow and develop quickly in the spring.

TOP NTEP (A AND B)

EXCELLENT DARK GREEN COLOR

TOP RATED SPRING GREENUP

TOP RATED GRAY LEAF SPOT RESISTANCE

AREAS OF USE

- High-Traffic & Heavy Wear Areas
- Professional Sports Turf
- Tees & Fairways
- Sod Production
- Residential Lawns
- Warm-Season Overseeding

SEEDING

Slugger 3GL readily establishes on loosened bare soil or after verticutting existing turf for renovation and overseeding. For typical new seeding applications, apply at a rate of 5-7 lbs/1,000 sq ft. Periodic reseeding at 3-5 lbs/1,000 sq ft maintains density for visual appearance and durability. For overseeding dormant warm season grasses, a rate of 30-40 lbs/1,000 sq ft is suggested for golf course greens. And 7-10 lbs/1,000 sq ft (300-450 lbs/acre) for tees, fairways and roughs.

MAINTENANCE

Slugger 3GL will form a tight knit turf under a broad range of soil types and environmental conditions, from full sun to medium shade. It will mow cleanly at heights of ½" and above. Slugger 3GL can be maintained at fairway cutting heights when appropriate management practices are observed.
