BLACKSTONE

PERENNIAL RYEGRASS

THE PEAK OF TURF QUALITY

- EXCELLENT TURF QUALITY
- DARK GREEN
- FINE BLADED
- FAST GERMINATION
- SELECTED FOR OVERSEEDING

Blackstone is the ideal perennial ryegrass for all your fine turf needs. **Blackstone** has excellent turf quality, ranking third in the latest NC State winter overseeding trial. **Blackstone** exhibits a very dark green color and retains its color throughout the season. In addition, **Blackstone** establishes well, providing quality cover quickly. **Blackstone** was bred for improved transition, both into and out of the overseeding season. In addition, **Blackstone's** controlled growth during the season means fewer mowings and less clippings.

2015-2016 UNIVERSITY OF ARIZONA OVERSEED FAIRWAY TRIALS

SEEDING AND OVERSEEDING Blackstone readily establishes on loosened bare soil or after verticutting existing turf for renovation and overseeding. For typical new seeding applications, apply at a rate of 5-7 lbs. per 1000 sq. ft. Periodic reseeding at 3-5 lbs. per 1000 sq. ft. maintains density for visual appearance and durability. For overseeding dormant warm season grasses, a rate of 30-40 lbs. per 1000 sq. ft. is suggested for golf course greens. And 7-10 lbs. per 1000 sq. ft. (300-450 lbs. per acre) for tees, fairways and roughs.

MAINTENANCE Blackstone will form a tight knit turf under a broad range of soil types and environmental conditions, from full sun to medium shade. It will mow cleanly at heights of 1/2" and above. Blackstone can be maintained at fairway cutting heights when appropriate management practices are observed.
