DURBAN

SEASHORE PASPALUM

**EXCEPTIONAL
DROUGHT RESISTANCE**

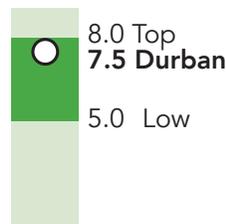

**SUPERIOR DISEASE
& PEST RESISTANCE**

**BEAUTIFUL
APPEARANCE**

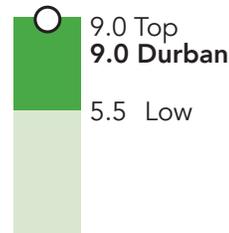

**THRIVES IN COLD
ENVIRONMENTS**

Tired of struggling with Seashore that can't withstand the elements? Look no further than Durban Seashore Paspalum. This innovative new cultivar, with a history pointing back to collections from South Africa, is specifically engineered to thrive in cold and drought-prone environments. Durban Seashore Paspalum is the hardest seashore paspalum on the market, making it perfect for regions with harsh winters. Its deep root system allows it to withstand extended periods of dry conditions, reducing the need for excessive watering. This cultivar is naturally resistant to common turfgrass diseases and pests, ensuring a healthy and vibrant lawn. Durban Seashore Paspalum boasts a lush, emerald-green color and a dense, reduced seed heads, with uniform texture that will enhance the aesthetic appeal of your property.
